

**OPTIMIZED COEFFICIENT OF FRICTION**

# OUTDOOR OEM CABLE SLIDE

## AVIENT SOLUTION

LubriOne™ Internally Lubricated Formulation

## WHY AVIENT?

- Utilized material expertise to present multiple customized options, allowing the customer to select a solution that best met both cost and performance requirements
- Quickly turned around a specialty formulation that outperformed the incumbent and competitive materials being reviewed
- Delivered solution that worked with existing tooling to minimize costs
- Supported material transition with coefficient of friction testing and live technical service

## LEARN MORE

## KEY REQUIREMENTS

- Reduce wear and improve performance to minimize noise and string fraying caused by highly repetitive use
- Increase lubricity while maintaining balance of rigidity and impact strength
- Perform in outdoor environments
- Reduce total part price
